[ AVAILABLE – Summer 2025 onwards ]

## ABOUT ME

Ambitious CS student at Northumbria University with real-world experience shipping PHP REST APIs, building automation tools, and running a multi-brand tech business. I combine academic rigour with hands-on delivery — I don't just study software, I build it. Seeking a placement or junior role where I can contribute from day one.

## PROJECTS

### PHP REST API — Conference Management System

KV5035 Software Architecture · Northumbria University · 2025

- ▶ Built a full CRUD REST API in PHP with dynamic search, pagination (LIMIT/OFFSET) and relational MySQL queries.
- ▶ Designed endpoints for presentations, authors, affiliations and type filtering — joining 5 tables with GROUP\_CONCAT aggregation.
- ▶ Implemented WHERE 1=1 dynamic filter chaining and parameterised queries to prevent SQL injection.
- ▶ Hosted on nuwebsite; documented with endpoint references and sample responses.

### Metro Train Live Display App

Web Development Module · Northumbria University · 2024

- ▶ Consumed a live transport API to display real-time arrivals, departures and platform data.
- ▶ Built responsive front-end with HTML/CSS/JS; handled async fetch, error states and data refresh.

### AI Usage Framework — Coffee Design Ltd

Team Awesome Sauce · Consultancy Project (Report Lead) · 2025

- ▶ Led report writing for a responsible AI framework delivered to a real Newcastle-based creative agency.
- ▶ Synthesised research on AI ethics, tool selection and adoption roadmaps into a professional client brief.

### Balancewise Ltd — Multi-Brand Business Group

Founder · Balancewise Clothing / Logistics / IT · 2023 – Present

- ▶ Architected email and domain infrastructure across 3 brands using Zoho Mail and DNS management.
- ▶ Set up Microsoft Entra ID home lab; exploring ROS 2 robotics and automation on Mac Mini.
- ▶ Demonstrates real-world initiative in cloud identity, infrastructure and product delivery.

## EXPERIENCE

### Security Officer

Argenbright Security Europe (ASEL) · Apr 2024 – Oct 2025

- ▶ Recovered assets exceeding £10,000 through CCTV analysis and investigative reporting.
- ▶ Deployed across high-value retail sites — Tesco, Lidl, Aldi, Amazon.

### Lead Representative (International) — Engineering & Environment

Northumbria Students' Union · Jul 2024 – Jun 2025

- ▶ Represented international students to faculty and senior management; drove policy improvements.

## TECH STACK

### Backend

- PHP
- MySQL
- REST APIs
- Python

### Frontend

- HTML5
- CSS3
- JavaScript

### Tools

- Git / GitHub
- VS Code
- Linux / Bash

### Cloud & Infra

- Microsoft Azure
- Entra ID
- Zoho DNS

### Learning

- ROS 2
- Node.js
- Docker

## CERTIFICATIONS

- Azure AI Fundamentals *Microsoft*
- SIA Licence *Verified*
- HL3 First Aid at Work *Highfield*
- Mental Health First Aid *MHFA England*
- Level 2 Food Safety *Highfield*

## STRENGTHS

- Fast learner
- Self-starter
- Attention to detail
- Team leadership
- Written communication
- Problem solving
- Business mindset

## LANGUAGES

- English *Fluent*
- Igbo *Native*

## **IT Technician & Graphic Designer**

*FreshCare Systems Limited* · Dec 2020 – Feb 2022

- ▶ Delivered IT support, hardware maintenance and graphic design for a technology-focused firm.

## **EDUCATION**

---

### **BSc (Hons) Computer Science — Level 5**

*Northumbria University* · Oct 2023 – Jun 2026 (expected)

- ▶ Key modules: Software Architecture (KV5035), Web Development, Data Systems, Algorithms.
- ▶ Final-year options: Robotics, Machine Learning, Cloud Computing.
- ▶ Report Lead on real-client AI consultancy project; Student Union International Representative.

### **International Foundation Programme in Computing**

*Northumbria University* · Sep 2022 – Jun 2023
